Summary

Final-year B.Tech CSE student (graduating May 2027, CGPA: **8.20/10**) interning at **Accenture** (built AI-assisted SQL migration remediation tool for Teradata→Snowflake enterprise healthcare pipelines) and **IIT Patna** (LLM research with hands-on Python implementation). Proficient in Python, SQL, Node.js, REST APIs, and developer tools. **AWS Top 3 / 500+ participants**; solved **300+ DSA problems**.

Education

Graphic Era Hill University **Bhimtal, Uttarakhand, India**

*B.Tech, Computer Science and Engineering — CGPA: **8.20 / 10.00*** *Aug 2023 – May 2027 (Expected)*

- **Relevant Coursework:** Data Structures & Algorithms, OOP, Database Management Systems, Operating Systems, Computer Networks, Machine Learning, Cloud Computing

Experience

Accenture **Chennai, India**

Custom Software Engineering Associate Intern *May 2026 – Present*

- Built an **AI-assisted, human-in-the-loop** Teradata→Snowflake SQL remediation tool (Python, Claude via Snowflake Cortex) covering **4 healthcare data pipelines** (∼1,000 lines/script, PII data).
- Engineered complete Snowflake test environment from scratch — **35+ tables** and **7 stub PII-tokenization UDFs** — by reverse-engineering scripts where no reference database existed, enabling end-to-end execution.
- Developed variable-resolution pre-processor eliminating `&{VAR}` token failures that blocked **100% of scripts** on line 1; catalogued **9 severity-ranked** Teradata→Snowflake migration issue classes.
- Implemented **Snowflake zero-copy cloning** with 5-iteration cap and 200K / 5M-token cost guardrails; reviewed **50+ SQL scripts** for schema compatibility, data integrity, and crash-safe audit trail.

Indian Institute of Technology Patna (IIT Patna) **Remote**

Research Intern — Large Language Models & Multi-Agent AI *June 2026 – Present*

- Analyzed EduPlanner (IEEE TLT 2025), identified **5 research gaps**, and **wrote Python code** integrating AI models for Dynamic Knowledge Tracing (DKT), 3-LLM ensemble evaluation, and SymPy-based mathematical verification — fully integrated into the existing multi-agent framework.
- Reviewed and synthesized **30+ peer-reviewed research papers** on LLMs and multi-agent systems to identify gaps and validate proposed framework improvements.

Projects

Customer Relationship Management (CRM) System | *Node.js, Express.js, MongoDB, Mongoose, REST API, JavaScript, Git* 2026

- Built full-stack CRM using **MEN stack** (MongoDB, Express.js, Node.js) with MVC architecture for managing customer records and business workflows.
- Architected **15+ RESTful API** endpoints with full CRUD operations, input validation, Mongoose ODM schema design, structured JSON responses, and error handling.

Technical Skills

Languages: C++, Python , JavaScript, SQL

Backend & APIs: Node.js, Express.js, REST API Design, MVC Architecture, CRUD, Middleware, Input Validation, Error Handling

Databases: MySQL, MongoDB, PostgreSQL, Mongoose ODM, Snowflake

Developer Tools: Git, GitHub, Postman, VS Code, Linux, Agile

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering, SDLC

Certifications & Achievements

AWS Jam — Top 3 / 500+: Ranked Top 3 out of 500+ participants in AWS cloud architecture competition;

DSA: Solved **300+ problems** on LeetCode and GeeksforGeeks

Accenture: Competitively selected as sole campus candidate for the Custom Software Engineering Associate Intern role, Chennai

IIT Patna Research: Selected for research internship at IIT Patna (Institute of National Importance) on LLMs and Multi-Agent AI

Certifications: AWS Certified Cloud Practitioner (Foundational) | NPTEL — Cloud Computing | NCC B Certificate
